PROJECTS

Library Profile (https://github.com/JesusVelaz/SE-Library-Project)   **January 2023 – May 2023**
This project was created in Java using IntelliJ IDE, MySQL database, Spring Boot REST API, and Postman to make HTTP requests. In this project the four user stories completed were adding and updating user profiles, viewing a user profile, and adding credit card info to the user.

Stocks App (https://github.com/JesusVelaz/Stocks-Application)   **May 2023**
This application was done in Python, using Yahoo Finance API to get information regarding the stock inputted. The application was made using Streamlit and displays valuable information regarding the company selected.

PokeDex App (https://github.com/JesusVelaz/PokeDex-App)   **August 2023**
This project was created using HTML, CSS, JS, and React. This project uses the PokeApi API to extract and display over 800 Pokémon's names, abilities, images, and stats.
